

SANKE SILAS

Full-Stack Developer | Electrical & Electronics Engineer

Kaduna City, Nigeria | (+234) 810 341 1020

silassanke14@gmail.com | GitHub: github.com/sankzy | Portfolio: <https://sanke-silas-portfolio.vercel.app/>

PROFESSIONAL SUMMARY

Detail-oriented **Full-Stack Developer** and Electrical Engineer with a proven track record of building production-ready applications. Recently completed a **Y Combinator (YC) Software Engineering Job Simulation**, demonstrating the ability to ship features in a fast-paced startup environment. Proficient in **Next.js, Node.js, MongoDB, and SQL**. Expert at bridging the gap between complex engineering logic and user-centric software solutions

TECHNICAL SKILLS

- **Frontend:** Next.js (App Router), React.js, Tailwind CSS, JavaScript (ES6+), TypeScript, Dragula.js.
 - **Backend & Database:** Node.js, Express, SQL (SQLite), MongoDB, Mongoose, Server Actions, REST APIs.
 - **Tools & DevOps:** Git, GitHub, Vercel, Jira (Proficient), Trello, Postman, NVM.
 - **Engineering:** Logical Debugging, Circuit Design, PLC Logic, Automation, Systems Architecture.
-

FEATURED SOFTWARE PROJECTS

Shiptivitas Logistics Kanban (YC Startup Task) | GitHub: [\[github.com/sankzy/shiptivitas-1\]](https://github.com/sankzy/shiptivitas-1) *React.js, Node.js, SQL, Dragula.js*

- **Frontend:** Built an interactive Kanban-style task management system enabling real-time drag-and-drop reordering.
- **Backend:** Integrated a Node.js persistence layer to synchronize workflow states and priorities with a database.
- **Data Analytics:** Analyzed product usage data using SQL to measure Daily Active Users (DAU) and proposed data-driven feature ideas to improve engagement.
- **Product Thinking:** Translated user behavior and metrics into actionable feature hypotheses for a high-growth logistics startup.

Full-Stack Internship Tracker | [Live: intern-job-tracker.vercel.app]

Next.js, MongoDB, Tailwind CSS, Vercel

- Developed a full-stack dashboard with real-time status updates to manage high volumes of job applications.
 - Implemented Server Actions for efficient database communication and Mongoose for schema architecture.
 - Designed a mobile-responsive UI with dynamic color-coded status badges.
-

EXPERIENCE

Digital Bridge Institute, Abuja | *Value Added Service (VAS) Intern* | FEB 2025 – OCT 2025

- Implementing and customizing Jira workflows to drive team efficiency and project transparency.
- Managing project lifecycles and fostering collaboration across technical engineering teams.

TELink Communication Limited, Kaduna | *Computer Operator & Data Entry* | SEPT 2019 – AUG 2023

- Managed database operations using MS Access and Excel, optimizing data retrieval speeds.
- Award: Received "Outstanding Performance Award" for consistent 90%+ accuracy in data management.

China Civil Engineering Construction Co. | *Marine Electrician* | OCT 2023 – JAN 2025

- Conducting complex troubleshooting and maintenance of marine electrical systems.
-

EDUCATION & CERTIFICATIONS

- YC Software Engineering Job Simulation (Forage) – March 2026
- Higher National Diploma (HND) in Electrical/Electronics Engineering – Kaduna Polytechnic
- Certificate in HTML5 & CSS3 – Pirple Academy
- Artificial Intelligence (AI) with Python – Great Learning Academy
